

Resilinc Tariffs Agent

AI-Powered intelligence for tariff
risk and trade disruption

AI Assistant

Your AI agent for tariffs intelligence

Tariff volatility is blindsiding global supply chains. Most companies react too slowly, relying on manual tracking and fragmented data. **The Tariffs Agent changes that.** Powered by the Resilinc agentic AI platform, the Tariffs Agent is an intelligent assistant that:

- ▶ Monitors global trade and tariff policy shifts in real time.
- ▶ Maps risk across your parts, suppliers, and sites — down to n-tier levels.
- ▶ Recommends proactive actions to protect margin and supply continuity.

No dashboards to dig through. Just clear, instant answers via a natural language AI chat.

What you get — instantly

- ✓ **Tariff policy monitoring**
Continuously track global trade policy changes with AI-powered filters to highlight what impacts your supply chain.
- ✓ **Impact mapping**
See which parts, suppliers and regions are affected with risk scoring, before impacts affect your bottom line.
- ✓ **Scenario modeling**
Simulate “what-if” situations before policies go into effect.
- ✓ **Built-in AI chat interface**
Ask anything and get actionable answers fast.
- ✓ **Mitigation recommendations**
Clear, instant answers to tariff challenges via a natural language AI chat.

Why it matters now

Tariff policy changes are accelerating across EVs, batteries, semiconductors, and more.

Financial exposure is rising, especially for China + Mexico sourcing.

Competitors that react faster gain cost and service advantages.

Trust built in

The **Tariffs Agent** is designed for mission-critical decisions — and held to mission-critical standards.

► **No data sharing with LLMs**

Your data stays private and it's never used to train public model.

► **Human oversight when it matters**

You stay in control — agents guide and automate, but you approve actions.

► **Explainable, auditable logic**

Every recommendation is backed by traceable data, tools, and rationale — no black boxes.

► **QA at enterprise scale**

Nightly production tests, automated validations, and enterprise monitoring are built into every release.
