Resilinc UFLPA Agent

AI-powered Intelligence for forced labor compliance

Your trusted AI resource for UFLPA compliance

Enforcement of the Uyghur Forced Labor Prevention Act (UFLPA) is intensifying across aluminum, copper, steel, lithium, and other critical industrial inputs. When CBP applies a rebuttable presumption, every shipment is considered guilty until proven compliant within 30 days. The **Resilinc UFLPA Agent** helps compliance, legal, and supply chain teams:

▶ Detect supplier and shipment risk before CBP detentions occur

▶ Score exposure by revenue-at-risk, parts, and facilities

▶ Automate attestations, documentation, and compliance reporting

No manual chases or spreadsheets. *Just instant risk flags and audit-ready evidence powered by agentic AI.*

What you get — instantly

✅ **Forced labor risk monitoring**

Continuously scan suppliers, shipments, and parts against CBP/DHS, OpenSanctions/NGO, and Kharon data sets to flag exposure

✅ **Impact mapping**

See which suppliers, materials, and trade routes are at risk, with revenue-at-risk scoring

✅ **Built-in AI chat interface**

Ask compliance questions and get instant, actionable answers

✅ **Remediation recommendations**

Guided workflows to manage supplier assessments, corrective actions, and compliant alternatives

What leading teams achieve

- ✅ **Up to 75% reduction** in manual compliance effort

- ✅ **Up to 3× faster** regulatory response times

- ✅ **Significant cost savings** per avoided detention

- ✅ **Measurable brand protection** and stronger customer trust

Why it matters now

🏛️ **Enforcement is escalating**
Thousands of shipments have already been detained under UFLPA

📊 **Financial and reputational exposure is growing**
Penalties, delays, and negative press can cost millions

🛡️ **Compliance is a competitive advantage**
Teams with automation and traceability prove compliance faster

Trust built in

▶ **Explainable, auditable logic**
Every recommendation is backed by traceable data and CBP documentation requirements

▶ **No data sharing with LLMs**
Your data is never shared or used to train public models

▶ **Human oversight**
AI resources guide and automate, but compliance teams stay in control

▶ **Enterprise-grade QA**
Nightly tests, automated validations, and monitoring ensure reliability at scale
